ORDER:-

Disease diagnosis is very essential to render apt and better quality treatment to the animals and for effective Disease Management and prevention. Accurate diagnosis of the disease not only enables the clinician to render rational treatment but also helps the farmers to conserve their resources on unnecessary expenditure on account of trial and error treatment. Further, in order to obtain accurate results, the specimens collected needs to be transported to the laboratory in cold chain within the shortest possible time and the transportation of specimens for too longer distances may result in deterioration of the quality of specimens collected which may lead to errors in the disease diagnosis process. At present, there are (4) Regional Animal Disease Diagnostic Laboratories (RADDL) and (10) District Animal Disease Diagnostic Laboratories (DADDL) functioning in the State, covering all District Head Quarters, but are inaccessible to the farmers and Veterinarians.

2. The Director of Animal Husbandry has therefore proposed for establishment of the Animal Disease Diagnostics Laboratories covering all the 175 Assembly Constituencies in the State, to ensure effective Disease Management and Disease Prevention in the animals as detailed below:-
